

Safety, Health & Environmental Services Events

The Construction Safety Group of Kansas City's golf tournament returns

Join the Construction Safety Group (CSG) of Kansas City for the 29th annual scholarship golf tournament on Sept. 15, 2023, at Shoal Creek Golf Course. Check in begins at 8 a.m. The tournament benefits students majoring in Occupational Safety, Health & Environmental studies at Pittsburg State University and the University of Central Missouri. This annual highlight has sold out for the last few years, so sign up soon. Register [here](#).

Suicide Prevention Week, Sept. 4-8, 2023: Together we can save lives

In 2020, a mission-driven group of volunteers from across the construction industry came together with the goal of saving lives. They collaborated to launch the inaugural Suicide Prevention Week for the industry – a week dedicated to raising awareness about the higher-than-average number of suicides in the construction industry, and to providing resources to help prevent those deaths.

Every year, during September – National Suicide Prevention Month – the construction industry will dedicate a week to raising awareness about the unique challenges workers face in construction that lead to suicide and what we can do to prevent it. Together, we can save lives.

Use the [resources](#) provided to plan activities with your workers during Suicide Prevention Week and [let us know](#) how you participated. Participating companies will receive an OSHA-recognized, industry-endorsed certificate of participation and badge you can display on your website and social media.

In 2022, nearly a quarter million construction workers representing 48 states and territories of the U.S. registered their participation in Construction Suicide Prevention Week via this website. That's an increase over more than 68,000 workers from 32 states who participated in 2021. Let's reach even more people in 2023. Visit the website at: www.constructionsuicideprevention.com.

Midwest Construction Safety Conference, March 7-8, 2024

The Midwest Construction Safety Conference (MCSC) is committed to improving construction safety throughout the region with top-tier education from safety experts across the construction industry. The conference and expo will return March 7 and 8, 2024, at [Adams Pointe Conference Center](#) in Blue Springs, Missouri. Registration and vendor details for 2024 will be announced later.

OSHA Silica Competent Person Course

Description: The purpose of this course is to educate course participants about OSHA’s Crystalline Silica Standard in the Construction Industry and provide an understanding of the hazards of respirable crystalline silica and appropriate ways to limit exposure. A key component in preventing overexposure to silica and subsequent disease is to have at least one individual on the jobsite who can recognize and evaluate situations where over exposure may be occurring; who knows how to evaluate the exposure potential; and who can make an initial recommendation on how to control that exposure. This is the role of the “Silica Competent Person.” OSHA 29 CFR 1926.1153 requires each employer to have a “Silica Competent Person” who can identify existing and foreseeable respirable crystalline silica hazards.

Knowledge check: A written multiple-choice learning exercise is administered at the conclusion of the course.

Course completion documentation: Upon successful course completion, each participant will receive a photo ID data card from The Builders, a chapter of the AGC.

OSHA is fully enforcing the silica in construction standard. The Builders SH&E team can assist your organization in complying with all requirements of OSHA’s silica in construction standard, including company specific silica exposure control plans (ECP) and silica air sampling. For more information, please contact Matt Dierking at 816.595.4158 or mdierking@thebuildersagc.com.

OSHA Fall Protection Course

Description: OSHA standards require employers to provide fall protection training for each employee who might be exposed to fall hazards. The training shall enable employees to recognize the hazards of falling and shall train each employee in the procedures to be followed to minimize these hazards. This Fall Protection Course includes but is not limited to: establishing definitive parts of Personal Fall Arrest Systems (including body supports, lanyards, self-retracting lifelines, rope grabs, and anchorage components), anchorage points (determination and suitability), arresting forces (limits, methods to reduce, etc.), and fall distances (limits, deceleration distances). This course also covers the usage of equipment including: ladder climbing systems, horizontal lifeline systems, rescue and retrieval systems, rope grab systems, self-retracting lifelines and care/maintenance of fall protection equipment upon request.

Knowledge check: A written multiple-choice learning exercise is administered at the conclusion of the course.

Course completion documentation: Upon successful course completion, each participant will receive a photo ID data card from The Builders, a chapter of the AGC.

OSHA Hazard Communication Standard Course

Description: OSHA standards require employers to provide exposed employees with effective information and training on hazardous chemicals in their work area at the time of their initial assignment, and whenever a new chemical hazard the employees have not previously been trained about is introduced into their work area. This course covers the general requirements of OSHA’s Hazard Communication Standard and provides participants with the knowledge to facilitate recognition and understanding of chemical safety in the workplace. Specific topics covered in this course include hazard classification of health and physical hazards, chemical labeling, signal words, GHS Symbols (Pictograms), Safety Data Sheets (SDSs) 16 -section format and much more.

Knowledge check: A written multiple-choice learning exercise is administered at the conclusion of the course.

Course completion documentation: Upon successful course completion, each participant will receive a photo ID data card from The Builders, a chapter of the AGC.

OSHA Scaffolding Course

Description: This course covers the requirements for safe construction and use of scaffolding using OSHA’s construction scaffold standards as a guide. OSHA standards require employers to train each employee who performs work while on a scaffold trained to recognize the hazards associated with the type of scaffold being used and to understand the procedures to control or minimize those hazards. Course topics include hazards associated with scaffold design, assembly, disassembly and use, types of scaffolds, determining scaffold capacity, employee qualifications and training and maintenance, repair and inspection requirements.

Knowledge check: A written multiple-choice learning exercise is administered at the conclusion of the course.

Course completion documentation: Upon successful course completion, each participant will receive a photo ID data card from The Builders, a chapter of the AGC.

OSHA Forklift Operator Course

Description: This course has been designed to reduce injuries and property damage in the work environment for newly trained operators who are ready to go beyond the basics to experienced operators who are either new to your organization or have been with your organization for an extended period. Course topics include inspection of equipment, design criteria of the equipment, picking up the load, moving the load and setting down the load safely.

Knowledge check: A written multiple-choice learning exercise and Operator Performance Evaluation is administered at the conclusion of the course.

Course completion documentation: Upon successful course completion, each participant will receive a photo ID data card from The Builders, a chapter of the AGC.

OSHA 10-Hour Construction Outreach Course

Description: The OSHA 10-Hour Construction Outreach Course provides safety and health training to prepare employees for basic hazards found in the construction industry. Participants will gain an understanding of OSHA’s Construction Safety and Health Regulations as they apply to real world experiences. Each participant will receive a 29 CFR 1926 Construction Standards Book. Upon successful course completion, each participant will also receive a photo ID data card from The Builders, a chapter of the AGC and a U.S. Department of Labor (OSHA) 10-Hour Construction Outreach completion card.

Missouri House Bill 1549 - This course meets the requirements of HB 1549 that became effective on Aug. 28, 2009, requiring all on-site employees for contractors or subcontractors working on “Public Works” construction projects in which the contract or subcontract is signed on or after Aug. 28, 2009, to have completed an OSHA 10-Hour construction safety program or equivalent within sixty (60) days of beginning work.

American Red Cross Workplace First Aid/AED/CPR Course

Description: The purpose of this course is to give individuals in the workplace knowledge and skills necessary to recognize and provide basic first aid care for injuries and sudden illnesses until advanced medical personnel arrive and take over. This course also includes information on breathing or cardiac emergencies. Please wear comfortable clothing, as you will be asked to perform skills. Attendance of the entire session is required, and participants must complete all skill practices for certification. Upon successful course completion, each participant will receive an American Red Cross Universal Certificate indicating First Aid/AED/CPR that is valid for two years.

OSHA Confined Space Entry for Construction Course

Description: This course covers the safety and health hazards associated with confined spaces in the construction industry. Course topics include recognition of confined space hazards, identification of permit required confined spaces (PRCS) and non-permit required confined spaces (NPRCS), use of instrumentation to evaluate atmospheric hazards, ventilation techniques, development and implementation of a confined space program, proper signage and training requirements. This course also covers the key differences between OSHA’s general industry versus construction standards.

Knowledge check: A written multiple-choice learning exercise is administered at the conclusion of the course.

Course completion documentation: Upon successful course completion, each participant will receive a photo ID data card from The Builders, a chapter of the AGC.

OSHA Excavation Competent Person Course

Description: This course has been designed specifically for those involved in excavation, trenching, and related operations. OSHA requires a “Competent Person” to oversee these jobsites, as they are some of the most hazardous of all construction operations. Topics covered in this course include:

- 29 CFR 1926, Subpart P
- OSHA excavation competent person
- Inspection
- Soil classification categories
- Fall protection
- Protective systems
- Access and egress
- Exposure to falling loads
- Exposure to vehicular traffic
- Water accumulation
- Identification of underground utilities and one call system
- Hazardous atmospheres
- Emergency rescue planning
- Criminal prosecution and wrongful death lawsuits relating to trenching/excavation accidents

Knowledge check: A written multiple-choice learning exercise is administered at the conclusion of the course.

Course completion documentation: Upon successful course completion, each participant will receive a photo ID data card from The Builders, a chapter of the AGC.

OSHA Focus Four Hazard Course

Description: This course focuses on the top four hazards in the construction industry (falls, electrocutions, struck-bys and caught-ins). Construction workers make up approximately 6% of the country's workforce, but account for more than 20% of all job-related fatalities each year. Construction is one of the most hazardous industries in America; each year a substantial number of construction workers, and countless others, are injured by these four hazards. Participants will be introduced to accident prevention techniques and hazard recognition to improve their awareness about the focus four hazards and ways to abate these hazards. Upon successful course completion, each participant will receive a photo ID data card from The Builders, a chapter of the AGC.
